

BULK MATERIAL HANDLING EQUIPMENT

Doyle: The Stainless Steel Specialists

The Doyle family has been building top quality bulk material handling equipment for three generations. By building a large volume of stainless steel products, they are considered the most efficient manufacturer of mixers in the United States. There are over 5,000 of these mixers in use around the world today.

In addition to mixers, a full line of stainless steel conveyors and bucket elevators are manufactured.

Call Doyle for their assistance in meeting your mixing or bulk material handling need. You will be glad you did.

Doyle 9.88 Yard Rotary Mixer

First built by Doyle Manufacturing in 1961, this family of rotary mixers are known for quality. To operate, load the individual ingredients into the mixer mouth, while the drum rotates clockwise. When through mixing, simply reverse the drum's rotation, and the mixed product is discharged out the mouth where it entered the drum.

Specifications

Mixer Size	Yard Cap.	Length	Width	Height
2 Ton	2.47	11' 4"	5' 8"	6' 4"
5 Ton	6.17	13' 4"	7' 1"	7' 9"
6 Ton	7.41	14' 10"	7' 1"	7' 9"
8 Ton	9.88	16' 4"	7' 1"	8' 0"
10 Ton	12.35	19' 2"	7' 1"	8' 3"
